Price List Ireland

Introduction

The Lexus Charging Network rates are governed by the maximum charging speed, for which a fast charging speed usually also implies higher costs.

Lexus Charging Network differentiates the following charging speeds:

AC – alternating current (normal charging)
DC – direct current (fast charging)
HPC – high power charging (ultra-fast charging)

The maximum charging power capacity of each charging station can be found on the Lexus Charging Network website and the Lexus Link+ app.

Please note that the transaction units for charging in public areas may vary due to regulatory requirements in the individual European countries. A transaction is differentiated in terms of kWh, time (min.), or by charging event. All prices are individually based on charge point operators. A variable tariff applies with regard to the individual charging process. The prices depend on respective charge point operators. For charging abroad (= e-roaming), you will always pay the local sales rate without any additional fees.

provided by Digital Charging Solutions GmbH

All prices include VAT
1) The prices displayed as "flexible prices" vary depending on the operator of the charging station and are subject to change. Additional fees, such as session fees, blocking or other time based fees, may apply at certain charging stations. The current applicable price, plus any additional fees, will be displayed at a selected charging station in the map of the Lexus Link+ app or on the Lexus Charging Network website and can be checked directly prior to initiating a charging session.
2) The charging service contract runs for an indefinite period of time and can be terminated by the customer at any time from the reference date of the contract, with a notice period of no more than one month.

Charging Event Transaction

The invoicing of varying fees for charging is based on the appropriate tariff per minute (per commenced minute), per kWh or per charging event. The charging event starts if the vehicle is connected to the charging station and ends when it is disconnected. You can also recharge for free using the Lexus Charging Network service at free charging stations.

All rates incl. VAT, subject to changes and errors.
